

A close-up photograph of a person's neck and upper chest wearing a white crew-neck t-shirt. The t-shirt has the words 'the Choice' printed in a bold, dark grey font. The word 'the' is smaller and positioned above 'Choice'. The person has curly hair and their arm is visible on the right side of the frame.

# Signs & Symbols

A tear-out brand label or no brand label in the neck. This makes personalization very easy.

In transition. A tear-out brand label or no brand label in the neck. This makes personalization very easy.

# Fitting

## Body fit

Our body fit styles are slim cut and rather clinging to your body. Contoured and side seamed for a more next to body fit.

## Regular fit

These styles follow your body in a flattering way, without clinging to it. The sleeves and shoulders fit closer to the body. The regular fit is currently the most popular shape.

## Comfort fit

Drapes away from the body for a relaxed fit and extra movement. A timeless fit has a generous, comfort forward cut and fuller sleeves for freer movement throughout. This fit has a comfortable width.

## Longer length

In addition to the different sizes, these T-shirts are longer than standard size, which ensures a pleasant wearing comfort.

# Always on the move with softshell

In wintertime or when working outside water resistant clothing is a must. The best protection against nature's way? Softshell! Softshell clothing offers warmth, comfort and is water repellent. It breathes and is flexible, making this type of material very suitable for outdoor activities, such as exercise and work.

There is a type of softshell for every occasion. To make the right choice, keep in mind the Thermoplastic Polyurethane (TPU), water resistance and breathing properties. It will help the wearer to stay warm and dry during activities.

## 3 LAYER SOFTSHELL BONDED - 4 WAY STRETCH

Water repellent

Water resistance

1. Outside  
Polyester - spandex --- poplin
2. TPU breathable membrane
  - Windproof

# Back to School

Back to School Project Bangladesh has a very good network of schools at all levels. Children can receive education at very little or no cost. Yet there are families who do not see the opportunities that education offers. They focus on short-term profits and allow children to drop out of school to work in the household or on the farm. That is why The Choice founded the Back to School Project together with a manufacturer in 2007.

## Change the future

The local manual recognized extreme poverty in his village of Gonopaddi, an agro-based and underdeveloped district on India's electronic border. Most children in this region are drop-out students. Many families do not have enough to eat. The lack of education leads to this poverty because they cannot sustain themselves in the long run. Help was needed to change the social and economic situation.

## Stimulating children's potential

The Back to School Project noticed these problems and created a program aimed at dropout students. The philosophy of the program is to transform each child into their own change agent. It is not limited to learning; it is also aimed at boosting one's potential. Good practice, helping others and living a healthy life are all part of the project. The goal is to instill self-esteem and value of education in children so that they can influence the economic scenario and engage in social welfare. The Back to School Project has started a huge development; some group 1 students who started the program ten years ago are now studying at the university. These original school leavers aspire to become doctors, engineers, ministers or parliamentarians rather than work in the household or on the farm.

## Success of the project

The first year of the Back to School Project started with twenty students with only two teachers. Unlike mainstream schools, there were incentives to go to school: free eggs and biscuits and extracurricular activities to develop other social and cultural skills. They also received soap and toothpaste for health and hygiene. Because of the great re-

sults, more and more students wanted to participate and today there are more than 200 students, 20 teachers and computer training programs for the basic courses. Students up to and including class 4 are taught by students of the higher class. Pupils from group 5 come to the main building to attend lectures given by regular teachers.

## Make your own change

Together with the manufacturer, The Choice helps these children to transfer money themselves. Today there are no real school leavers in Gonopaddi and all children are included in the Back to School Project. They have become their own change agents with the ability to transform the Sherpur district for a brighter future.

In the poverty-stricken village of Gonopaddi, most students learn English by memorizing exercises from their textbooks. After twelve years, most of them still cannot understand and read English. The Back to School English Club was established to help these students – ranging from grades six to grades eleven – develop the English language. Two months after the start of the club, the students have let go of their fears and are fully committed to learning English, driven by their enthusiasm to overcome illiteracy.

## Goals of the initiative

- Improve students' understanding and communication skills in English.
- Improve their ability to network.
- Develop leadership qualities in students.
- Progression students in the field of technology.

# Private Label

# your story your style your private label

Private Label by Lemon & Soda is a unique clothing concept to strengthen your corporate identity or image of your company. We will work with you to translate your corporate identity and appearance into a suitable clothing line. We think along with you throughout the entire process, from concept to delivery, and provide advice where necessary. This way the end product fits seamlessly with your wishes.

A strong and recognizable image is of great importance for your brand or company. We design and produce clothing that is completely tailored to your wishes and requirements. Whether you are looking for corporate, promotional or merchandise clothing, Private Label by Lemon & Soda has it all!

Through years of experience in the clothing industry, we ensure that the process is simple and efficient for you. We are ready to guide you every step of the way. From designing the clothing, selecting the right quality fabrics and colors, to refining your logo and other artwork. We ensure that the items perfectly match your brand identity.

With Private Label you are assured of high-quality clothing. These clothes are made from durable materials that are comfortable to wear and last a long time. In addition, we have strict quality controls to ensure that only the best garments leave the factories.

Flexibility is paramount. Whether it concerns small quantities or larger production runs, we can meet all your wishes. We also offer the option of hang tags with your own logo and custom packaging. This so that your clothing line exudes even more exclusivity.

Curious about what we can do for your brand? Contact us and make a lasting impression with Private Label by Lemon & Soda!

why?  
the result is  
original and authentic

## your PRIVATE LABEL in 5 steps

Private label is of added value when you:

- Have your own vision on promotional and corporate clothing
- Want to customize an existing item
- Wants to put your own twist on an article
- Want to integrate your company's corporate identity more fully
- Wants to radiate exactly what your company stands for

# Private Label ■ Lemon & Soda

## step 1 Orientation phase

The process starts with an initial conversation between you as a customer and our team of designers. We delve deeper into the wishes and needs for your custom made clothing. We listen carefully to your ideas and ask questions to get a clear picture. We discuss which models and colors you have in mind and whether there are preferences for certain operations.

You or the end customer may also provide a model. Of course we can also make these.

unique designs and  
technical expertise  
come together  
at Private Label

## step 2 Design phase

Based on the information we have collected during the orientation phase, we will start creating the first designs for your private label clothing line. We make sketches to visualize the different styles and designs. We then present these to you and discuss any adjustments.

with your corporate identity vision  
as a basis, we can provide even  
better advice

## step 3 Material selection

After approval of the designs, we start selecting the right materials. We work with reliable suppliers to find high-quality fabrics and materials that match your designs and quality requirements. We ensure that the materials are comfortable to wear and long lasting.

## step 4 Quotation and order confirmation

After the materials have been chosen, the price is requested. This is supplied in a quotation, which once again includes all previously discussed and chosen details, such as the composition, operations and delivery time. If there are any adjustments, no problem, they can still be processed. As soon as the quotation has been approved and the size distribution is known, everything is worked out in detail in the order confirmation. After approval of the order confirmation, the production process starts.

everything is  
worked out  
down to the  
smallest detail

## step 5 Production process

Now that the order confirmation has been approved, we can start the production process of the private label clothing line. We work together with experienced manufacturers who specialize in producing tailor-made garments. First come the lab dips to determine the correct color. After the color has been selected, the fabric is knitted or woven and then dyed. You will then receive any print, embroidery or other branded accessories for approval.

Then follows the pre-production sample. Everything that has already been approved in parts comes together here. It is the right fabric quality, in the right color, with the right fit and with all approved treatments and accessories. It is, as it were, the first and final product from the production line. As soon as this has been approved, production will start.

We are in constant contact with you and the manufacturers to ensure that production goes according to plan and quality is guaranteed.

## Quality control and delivery

Before the clothing is shipped, we subject the products to strict quality control to ensure that each item meets the highest standards. We pay attention to matters such as correct sizing, sturdy stitching and good finishing. After this check, the garments will be sent to you.

## Support after extradition

For us, the process does not end with the delivery of the garments. We also offer post-delivery support to ensure you are happy with the end result. We are ready to answer questions and help with any problems. We strive to build a long-term partnership and make your private label collection successful.

With the Private Label by Lemon & Soda you are assured of high quality, unique designs and excellent service. Together we create a clothing line that fits your identity and brand values. Contact us and discover the many possibilities for your own private label clothing line.

# Additional info

# An overview of different yarn

## Single Jersey

Jersey, or tricot, is a fine and elastic knitting technique. The fabric is comfortable and stretchy. Single jersey is knitted in a right-left weave, with a v-pattern on the front of the fabric. So it has a clear front and back.

## Elastane

A synthetic fiber that is exceptionally elastic. It differs from other synthetic fabrics because it is more elastic but at the same time stronger. Without tension, the fabric returns to its original shape. It is light in weight and the elasticity in elastane offers plenty of room to move, without losing fit.

## Combed Cotton

After carding, the yarn is passed through a combing machine to remove the short fibres. This gives the finished fabric a silkier feel, making it softer, more resistant in the wash and more hard-wearing. It ensures smooth surfaces for decoration access.

## Ring-spun Cotton

Ring-spun cotton T-shirts are thinner, smoother and softer than regular 100% cotton T-shirts. It feels like it has been washed dozens of times. This is because the yarn is spun in such a way that it produces stronger, longer and thinner cotton strands.

## Ring-spun Combed Cotton

Undergoes a final step before the fabric is woven. The fibres produced during combing are thinned and twisted, which produces a softer, more resistant yarn that is less susceptible to shrinkage. Ideal for high-quality printing.

## Piqué

This technique creates a sturdy, breathable fabric with a small relief. Piqué is widely used for polo shirts. Traditionally pique fabric was made only from cotton, but nowadays it is mixed with synthetics to create more strength. The difference with jersey is that pique fabric is a bit firmer and thicker.

## Recycled Polyester

Recycled polyester offers the same high-quality characteristics as conventional polyester but with a smaller environmental footprint. The production of recycled polyester requires far less energy, causes significantly less CO<sup>2</sup> emissions and helps keeping plastic waste from going to landfills and our oceans.

## ACTIVE-DRY® Polyester

This fabric dries quickly, has excellent moisture management, feels soft and is very elastic. Therefore it is perfectly suitable for sports and functional clothing. The airy fabrics are very moisture-wicking and provide a pleasant feeling, even during intensive training. ACTIVE-DRY® polyester not only offers great wearing comfort, but is also ideal for various textile finishes.

## Bird-eyelet Mesh

Birdseye mesh fabric is a breathable textile commonly used in sportswear. With an open structure, it ensures good air circulation, moisture regulation, and quick drying. Lightweight and durable, it is often employed in sports shirts and pants for maximum comfort during intense activities.

## Interlock

A knitted cotton, also called double jersey, because two layers are knitted together. Unprinted, both sides are therefore the same and there is actually no right or wrong side. After printing, of course, but the inside feels just as soft.

## Nylon

Smooth, moisture-wicking and very durable fabric, making the perfect choice for athletic and outdoor clothing. Nylon is one of the lightest textile fibres and at the same time one of the strongest. Thanks to its high elasticity and moisture-wicking properties, nylon textiles offer great wearing comfort and excellent freedom of movement.

## Viscose

A high-quality material made from the natural raw material cellulose. The fibre is very soft to the touch, moisture absorbent and very breathable. It can be both glossy and matt and thus take on the look of wool, silk or cotton. T-shirts with a viscose share drape fluidly around your body, creating a premium wearing-comfort as well as an elegant, flattering silhouette.

## Fleece

Fleece is popular and indispensable companions in everyday life or for outdoor activities, as they provide strong insulation and can absorb and release moisture very well. They are light, breathable and keep you pleasantly warm even in cooler weather. There are many different kinds of fleece fabrics.

## Softshell

The outstanding features of softshell styles are their light weight and the combination of three layers in one garment. Softshell combines an outer layer to protect against wind and weather with a breathable membrane and soft micro fleece on the inside. Therefore, softshell products are wind-, water- and dirt-repellent. The pleasantly stretchy material ensures a high level of wearing comfort.

## Full Feeder Yarn

Yarn feeder for weft knitting machine. A yarn feeder comprises a switching mechanism which presets a swing direction of the yarn feeding port after completion of a yarn feeding operation, and, after having completed yarn feeding operation, changes over the swing of the yarn feeding port from one yarn feeding position to another standby position interlocking.

## Careguide

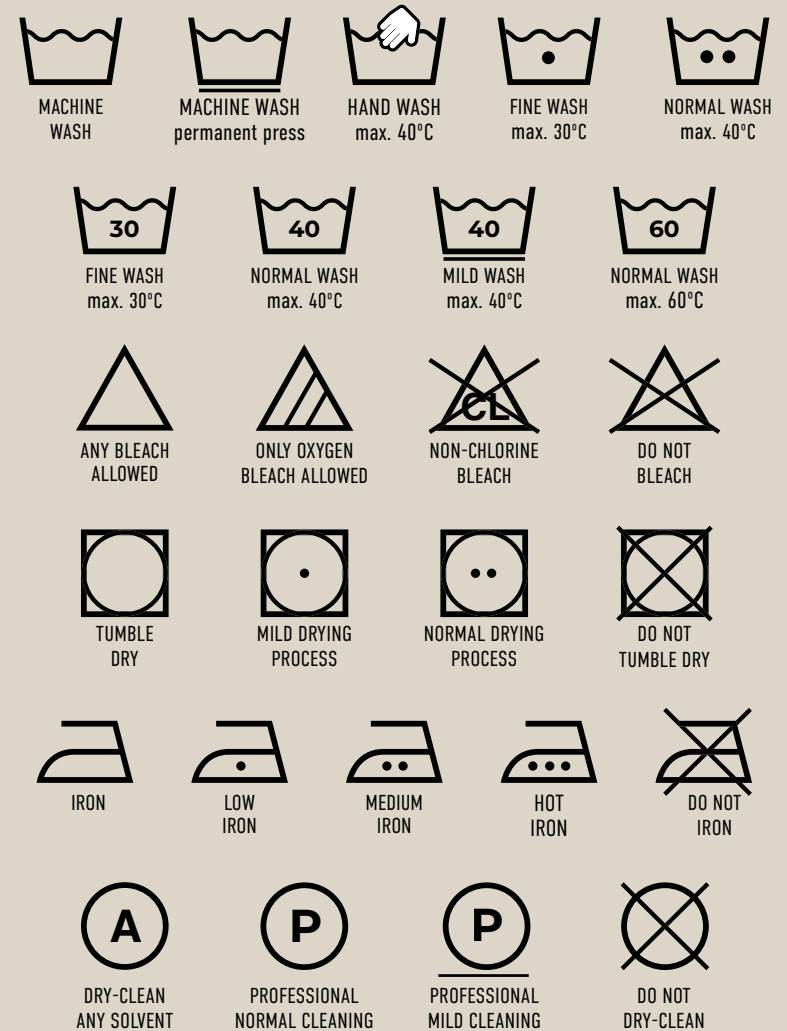

We care about the garments that we produce, so we choose our materials very carefully. Follow the instructions on the care label to enjoy these garments even more!

### Washing tips

- Always read and follow the care label
- Read and follow the instructions on your detergent pack
- Use the recommended amount
- Polar fleece and sweats can best be washed before wearing
- Wash inside out
- Close zippers before washing
- Sort laundry by temperature in care label, 40 °C, 60 °C etc.
- Wash dark colours separate
- Don't iron on decorations
- Always wash a full load
- Pre-washing is not needed for most garments
- If you have a condenser dryer, reuse the water – it's great in irons

### Washing & the environment

Washing and drying at home represents 75% of the energy used in a garment's life cycle, so it really is an area where you have an impact on the environment. For the best cleaning, we recommend washing your clothes at the temperature indicated on the care label. Often a piece of clothing only needs to be refreshed instead of cleaned and washing at 30°C is fine. Natural line drying reduces the amount of energy used in the aftercare process. However, it is not always practical and that is why many people use tumble dryers. When purchasing a dryer, think about a good energy classification so that you use the energy in the most efficient way.

# Additional tool to serve the customer

Promotional brands is a user-friendly website, prices are stated for the end user, for everyone to view this neutral website.

Handy, easy & clear!

# The Choice & Sustainability

The Choice catalog has been a well-known and major player in the promotional market for many years. In the coming years, with a view to sustainability, we will also be clearly visible online in addition to the catalogue.

This The Choice is printed on FSC certified paper. This environmental certificate fits within our philosophy of taking responsibility as a company for our role within society and the living environment.

The Choice focuses on economic, social and living environment needs. Sustainability is an important pillar of the articles in The Choice. Our products are tested for longevity. The origin of materials is transparent and origin and fair working conditions are taken into account. Stedman has a line made from recycled material.

But it's not just our products where we implement sustainability. It also continues within business operations. Our aim is to install solar panels on the business premises by 2024. Since last year, there have been charging stations in front of the building for electric cars and we use green energy.

The Choice has its own large distribution center where used plastic is collected and recycled. Cardboard is reused and our employees think about the use of non-reusable materials.

Since 2023, The Choice has been affiliated with Stichting UPV Textiel. This foundation was established in response to the Decision on Extended Producer Responsibility (UPV Textiel) in the Netherlands, which holds importers and textile producers accountable for collection, recycling, and reuse. Over 650 companies have joined this collective initiative, currently representing more than 70% of the market. The foundation collectively organizes the collection and processing of discarded textiles to efficiently, effectively, and affordably meet the UPV obligations.

The Choice is for a livable future and takes nature and people into account.

## Certificates

Fortunately, sustainability is on the agenda of various brands in our range. However, all this attention can lead to difficulty in distinguishing one quality mark from another. This is why the Choice lists the textile labels for you.

The ecological styles of Stedman with this label are made of 100% OCS certified ring-spun organic cotton. No toxic pesticides and fertilizers were used during the cultivation of the environmentally friendly cotton. This certificate is issued by Control Union Certifications (CU 819645).

Cotton Council International (CCI) is a non-profit trading association promoting American cotton fibers and cotton products worldwide with the Cotton USA trademark. Gildan is licensed for Cotton USA, which means the cotton in their products is from American soil and the products contain more than 50% cotton.

SPQ stands for Stedman Proofed Quality. This is the certificate with which Stedman wishes to propagate all items are subject to strict quality controls. This applies to both the materials and the products.

Gildan has translated the Gildan Quality System (GQS) into a website on Genuine Responsibility. With their facilities and manufacturing, Gildan aims to implement industry-leading environmental, social and governance measures at every stage of the process. Visit the website [www.genuineresponsibility.com](http://www.genuineresponsibility.com).

Fair Wear was founded in 1999 with the ambitious mission to improve labour conditions in the garment industry. It is an organization in which companies, trade unions and NGOs all work together. Their work is based on the highest possible internationally recognised standards and conventions which are set through tripartite negotiations with the experience of workers as central. Since Fair Wear's inception, the collaboration with brands is based on the Code of Labour Practices (CoLP), eight labour standards derived from ILO Conventions and the UN's Declaration on Human Rights.

People for the Ethical Treatment of Animals (PETA) is the largest animal rights organization in the World. PETA opposes speciesism, a human-supremacist worldview, and focuses its attention on the four areas in which the largest numbers of animals suffer the most intensely for the longest periods of time: in laboratories, in the food industry, in the clothing trade, and in the entertainment business.

Bureau Veritas was founded as a classification society in Antwerp in 1828 and shortly afterwards established in Paris. The main activities are inspection, certification, testing and training when it comes to quality, health, safety and the environment in different sectors.

WRAP stands for Worldwide Responsible Accredited Production. It is the world's largest independent certification program, focusing on social compliance for the sewn products industry. WRAP is based on twelve principles ensuring that basic working conditions in factories are understood and implemented. The monitoring is done by third parties, so that independently is established that manufacturers comply with WRAP

The articles and materials, such as thread and buttons, have been tested for harmful substances and meet the extensive safety and quality standards that apply according to the Oeko-Tex-100 certification. This means that these articles do not contain any substances that are harmful to health. By carrying this quality mark, the manufacturers must continuously check and monitor the quality of the production in order to continue to guarantee safety.

Global Organic Textile Standard (GOTS) is an international quality mark that sets requirements for both the production of the fibers and their further processing into garments. At least 70 percent (indication: 'Made with organic') or at least 95 percent (indication: 'Organic') of the garment must consist of organically produced materials. Clothing labels do not always assess all links in the production chain. It is therefore indicated whether a quality mark sets requirements for the cultivation for fiber production, the processing of the fibers into cloth, and/or the final assembly of garments. This is also included in the assessment.

Ethical trading and improving working conditions in global supply chains; that is what Sedex is committed to. Gildan is a member of this service provider.

Amfori, an international professional organization committed to open and sustainable trade. Legal, humane and ethically responsible production is central to the Business Social Compliance Initiative (BSCI). This means that child labour, environmental nuisance and abuse are prohibited. Manufacturers must therefore adhere to the BSCI regulations regarding working hours, health, safety and the environment.

The Sustainable Apparel Coalition focuses on sustainable production in the clothing, shoe and home textile industry. The alliance primarily focuses on the Higg Index, a standardized supply chain measurement tool. This allows all participants to provide insight into and interpret the impact of their production on the environment, as well as working and social conditions. This allows urgent matters to be solved, which companies could never change independently.
